DETAILED ACTION

1. This application has been examined. The claims 1, 3 and 5-12 are allowed.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: None of the cited art teaches or suggests that an active matrix display device comprising an array of pixels arranged in rows and columns, wherein each column of pixels shares a column conductor to which pixel drive signals are provided, wherein the output buffer comprises a first transistor connected between the column conductor and a high power line and a second transistor connected between the column conductor and a low power line, wherein the slew rates of the first and second transistors are different as claims 1 and 11; or wherein the positive and negative slew rates of the output buffer are different wherein the pixels are driven in different frames with different polarity pixel drive signals, and wherein the pixel charging time from a first drive signal, having a first polarity and corresponding to a given brightness, to a second drive signal, having the opposite polarity and corresponding to the same given brightness, is substantially equal to the pixel charging time from the second drive signal to the first drive signal as claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
